MCS Digital (PWM) Electronic Throttle Controls for PERKINS 1100C, 1100D & 1204E Series

- Direct Drive Hand Throttle 976 000 series
- Top Mounted Hand Throttle 972 000 series
- Rotary Throttle 973 000 series
- Throttle Position Sensor 974 000 series
- Floor Mounted Throttle Pedal 965 000 series
- Agricultural Suspended Throttle Pedal 967 000 series
- Side Mounted Hand Throttle 975 000 series
- Suspended Throttle Pedal 963 000 series

MCS

We make your engine run
**Technical description:**

The $MCS^*$ Electronic Digital Throttle Controls have been developed to match the signal required to operate the **PERKINS** Engines 1100C, 1100D and 1200E Management System. The signal generated by the Throttle Controls will allow a smooth and precise engine speed control.

The Hall Effect Sensor, fitted on the Throttle Control has two galvanic separated output signals. Depending upon setting, the sensor can deliver one single **PWM** signal or two **PWM** signals which could be parallel or redundant.

The frequency of each **PWM** output signal is **programmable** between 200Hz and 500Hz. Nevertheless the frequency is factory preset. The duty cycle of each **PWM** output signal is **programmable** between 5% and 95%.

For **PERKINS** Engines 1100C,1100D and 1200E Management System, the sensor is factory preset with one single **PWM 500Hz** output signal.

The $MCS^*$ Electronic Digital Throttle Controls can be connected directly to the **PERKINS** Engines 1100C,1100D and 1200E Management System.

Optional wire harness according to customer specification (length and connector models) is available upon request.

Please don’t hesitate to contact our factory if you need any assistance about your application.
1. Electronic Heavy Duty Throttle Pedal

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Two built-in return springs
- Additional return spring built in the Sensor
- Angle options: 30°, 35° or 45°
- Protection classification: IP 66
- Die cast aluminium treadle and mounting plates
- Kick down virtual feedback and kick down signal available in option
- CE certified / Complies with 72/245/EEC
- Complies with FMVSS 124

**Mechanical specification:**

Technical spec sheets and part numbers of Digital Throttle Pedals with options such as twin sensors, kick down, swivel arm, twin PWM output, wire harness or connectors are available upon request.
2. Electronic Suspended Throttle Pedal

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Two built-in return springs
- Protection classification: IP 69K
- Material: PA66 GF30
- Magnetic kick down with optional kick down signal available in option
- CE certified / Complies with 72/245/EEC
- Complies with FMVSS 124

Technical spec sheets and part numbers of Digital Throttle Pedals with options such as twin sensors, kick down, swivel arm, twin PWM output, wire harness or connectors are available upon request.
3. Electronic Floor Mounted Throttle Pedal

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Two built-in return springs
- Angle options: 30°, 35° or 45°
- Protection classification: IP 69K
- Material: PA66 GF30
- Long or short treadle plate available
- Magnetic kick down with optional kick down signal available in option
- CE certified / Complies with 72/245/EEC
- Complies with FMVSS 124

Technical spec sheets and part numbers of Analogue Throttle Pedals with options such as wide mounting base, short treadle plate, kick down, swivel arm, wire harness or connectors are available upon request.
4. Electronic Agricultural Throttle Pedal

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Two built-in return springs
- Travel angle: max 20°
- Protection classification: IP 69K
- Material: PA66 GF30 / Steel
- Mounting plate and pedal arm are customizable
- Pedal pad design and color are customizable
- Pedal full position reached on cabin floor
- CE certified / Complies with 72/245/EEC
- Complies with FMVSS 124

**Mechanical specification:**

Technical spec sheets and part numbers of Analogue Throttle Pedals with options such as customized mounting plate, customized pedal arm, customized pedal pad, swivel arm, wire harness or connectors are available upon request.
5. Electronic Hand Throttle

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Adjustable actuating force
- Travel angle: 90°
- Protection classification: IP 66
- Allows engine constant RPM at selected rate through lever position
- Easy to use in combination with Throttle Pedal or Throttle Position Sensor
- Very convenient whenever engine is operated from more than one station
- CE certified / Complies with 72/245/EEC

**Mechanical specification:**

<table>
<thead>
<tr>
<th>Travel angle – Idle to full throttle -</th>

6. Electronic Rotary Control

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Adjustable actuating force
- Travel angle: 90°
- Protection classification: IP 66
- Allows engine constant RPM at selected rate through knob position
- Easy to use in combination with Throttle Pedal or Throttle Position Sensor
- Very convenient whenever engine is operated from more than one station
- CE certified / Complies with 72/245/EEC

**Mechanical specification:**

Technical spec sheets and part numbers of Digital Rotary Control with options such as twin PWM, wire harness or connectors are available upon request.
7. Electronic Throttle Position Sensor

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- One return spring: 20N Idle – 25N Full +/-2N
- Travel angle: 42°
- Protection classification: IP69K
- Easy to be fitted on an existing pedal cable or linkage
- Very convenient whenever engine is operated from more than one station
- One additional external return spring required on throttle mechanism in order to be FMVSS 124 compatible
- CE certified / Complies with 72/245/EEC

**Mechanical specification:**

<table>
<thead>
<tr>

8. Electronic Side Mounted Hand Throttle

- Digital output signal: PWM 500Hz
- Fitted with Hall Effect Sensor
- Adjustable actuating force
- Travel angle: 90°
- Protection classification: IP 66
- Allows engine constant RPM at selected rate through lever position
- Easy to use in combination with Throttle Pedal or Throttle Position Sensor
- Very convenient whenever engine is operated from more than one station
- Certified / Complies with 72/245/EEC
